RAMBUSCH

110 Years of Designing and Making Objects

Come have a peek into the illustrious 110-year history of the Rambusch Company through never-before exhibited images selected from the Rambusch Archives at Columbia University's Avery Art and Architecture Library.

Current work will be the emphasis of the exhibition. Architectural crafts and lighting will be shown with drawings from the present Rambusch design rooms, where the tradition of custom solutions and individually made objects still prevails in our workshops.

At Rambusch, the connection between having ideas and making objects continues.
